

20 Years on Death Row!

December 9, 2001, will mark 20 years since Mumia Abu-Jamal was shot by police and arrested. 20 stolen years. He was convicted in a trial that Amnesty International called a travesty of justice. For 20 years he has lived in a solitary cell, his only contact with family and friends through glass. **In the current climate with all the government's attempts to suppress dissent, the "voice of the voiceless" is more precious than ever to the people!**

Mumia remains on death row under sentence of death. We must stop his execution. This vicious government has no right to take the life of anyone, let alone a man who represents the aspirations of people for a better world. His conviction should be overturned because he was framed up by police, prosecutors, and a racist judge. We call for Mumia to be free because no such fraudulent conviction should stand. Against the current climate of war and repression, let us build a climate, community, and culture of resistance!

Stop the Execution! Overturn the Conviction! Free Mumia Abu-Jamal!
